

End of Year expectations for Year 5 (Maths, Reading, Writing and Science)

This booklet provides information for parents and carers on the end of year expectations for learners in our school.

These expectations are based on the New National Curriculum and the age expected standards for the year group.

All objectives will be worked on throughout the year and will be the focus of direct teaching. Any extra support you can provide in helping your child to achieve these is greatly valued.

If you have any queries regarding the content of this booklet or want support in knowing how best to help your child, please talk to Mr Bonwick.

Maths

- Count forwards and backwards with positive and negative numbers through zero. Count forwards and backwards in steps of powers of 10 for any given number up to 1,000,000.
- Compare and order numbers with 3 decimal places.
- Identify all multiples and factors including finding all factor pairs.
- Recognise place value of any numbers up to 1,000,000 and round any number up to 1,000,000 to the nearest 10, 100, 1000, 10,000 or 100,000.
- Read roman numerals to 1000.
- Recall prime numbers up to 19.
- Add and subtract numbers with more than 4-digits using efficient written methods (column). Also numbers with up to 2 decimal places.
- Solve addition and subtraction multi-step problems in contexts.
- Multiply 4-digit by 1 digit and 2-digits.
- Divide 4-digits by 1 digit.
- Multiply and divide whole numbers and decimals by 10, 100 and 1000.
- Recognise mixed numbers and fractions, and convert from one to another.
- Multiply proper fractions by whole numbers.
- Recognise and use square numbers (2) and cube numbers (3).
- Solve time problems using timetables and converting between different units of time.

Reading

- Summarises main points of an argument or discussion within their reading and makes up own mind about issue/s.
- Can compare between two texts.
- Appreciates that people use bias in persuasive writing.
- Appreciates how two people may have a different view on the same event.
- Draw inferences and justify with evidence from the text.
- Varies voice for direct or indirect speech.
- Recognise clauses within sentences.
- Uses more than one source when carrying out research.
- Creates set of notes to summaries what has been read.

Writing

- Add phrases to make sentences more precise and detailed.
- Use range of sentence openers - judging the impact or effect needed.
- Begin to adapt sentence structure to text type.
- Use pronouns to avoid repetition.
- Use brackets, dashes, commas.
- Commas to clarify meaning or avoid ambiguity.
- Link clauses in sentences using range of subordinating and coordinating conjunctions.
- Use verb phrases to create subtle differences (e.g. she began to run).
- Consistently organise into paragraphs.
- Link ideas across paragraphs using adverbials of time (e.g. later), place (e.g. nearby) and number (e.g. secondly).
- Legible and fluent style.

Science

Living Things and their Habitats

- Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.
- Describe the life process of reproduction in some plants and animals.

Animals, including humans

- Describe the changes as humans develop to old age.

Properties and changes of materials

- Compare and group together everyday materials on the basis of their properties, including their harness, solubility, transparency, conductivity (electrical and thermal), and response to magnets.
- Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution.
- Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating.
- Give reasons, based on evidence from comparative and fair test, for the particular uses of everyday materials, including metals, wood and plastic.
- Demonstrate that dissolving, mixing and changes of state are reversible changes.
- Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.

Earth and Space

- Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.
- Describe the movement of the Moon relative to the Earth.
- Describe the Sun, Earth and Moon as approximately spherical bodies.
- Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.

Forces

- Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object.
- Identify the effects of air resistance, water resistance and friction that act between moving surfaces.
- Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.
